

PMSS have been offering cost effective solutions to the NHS for over 30 years.

## So much more than just a label company

PMSS have offered quality product solutions to the NHS for over 30 years.

Easy identification of the hygiene status of hospital equipment is critical in the battle to control infection. We offer a very simple but highly effective way of clearly marking all equipment which visually indicates its condition to staff.

The durable tyvek tag can be printed with the relevant information and colour coded so that it offers a uniform and easily recognisable system to manage hygiene.

A major benefit to the cleaning tags is that they no adhesive residue on valuable equipment that might be experienced when using more traditional labelling products.

The tags only use adhesive at one end to seal the tag around the equipment. This leaves the surface 'mark free' and therefore helps reduce the risk of further infection.

The tags measure 25mm x 250mm and come in sheets of 10 and in boxes of 1000. They are available in 14 background colours and can be bespoke printed.
