

PMSS have been offering cost effective solutions to the NHS for over 30 years.

So much more than just a label company

PMSS have offered quality product solutions to the NHS for over 30 years.

Our new 'I have been cleaned' infection control tape is ideal for identifying the hygiene status of commodes and other ward equipment.

Using a strong and effective adhesive seal, the tape has provisions to be dated and signed by the cleaning operative to offer a full audit trail.

The tape is applied to the equipment in a loop and by peeling off a small section of

backing paper, it is stuck to itself to avoid any adhesive contact with the equipment.

The strong adhesive ensures the tape stays sealed until the equipment is needed. NO residue is left on the equipment.

We are now offering a totally non-adhesive tape. This is particularly suitable for use on beds as the ends can be tucked under the mattress.

Each roll is 100 metres in length and if needed can be printed to meet your individual requirements.

A quotation can be prepared on request. Samples are available for you to view.
