PMSS have been offering cost effective solutions to the NHS for over 30 years.

So much more than just a label company

PMSS have offered quality product solutions to the NHS for over 30 years.

Adding to the varied range of products that we produce in house we have installed a plastic card print unit.

The machine is configured to print short runs of multi coloured customised plastic cards.

Full colour print on both sides of the card along with the ability to print variable data such as barcodes or sequential numbers can be achieved in one pass!

Printed on a 760 micron plastic or a 350 gsm paper card the machine has the ability to print edge to edge offering a high quality print finish.

The cards offer an ideal solution for patients with a medical condition. The card can be carried in a wallet or purse to alert First Responders or Paramedics of the condition and treatment can be administered accordingly.

Alerting hospital staff to drug allergies such as penicillin can easily be done by offering the patient the facility of carrying a Drug Allergy card.

The cards can also have a hole or lanyard slot to enable to cards to be carried around the neck or on a clip.
